Dear Patt

Thank you so much for the treatment you have given to [redacted] and me over the past few weeks.

[redacted] had suffered from a bad back for many years and had consulted her GP and a chiropractor without success. However, after 3 treatments from you, her back is now absolutely fine, and she will continue to see you every few months, for preventative treatment. You have also successfully treated her bad knee, following a fall.

As for me, I had been diagnosed with Carpal Tunnel Syndrome about 3 years ago and had received temporary treatment from my GP, but was destined to have 2 surgical operations, as I was told this was the only option. Luckily though, it was brought to my notice that you treat this condition and again, after 3 treatments, I am feeling much better, with no pain!

It does in our experience, often need more than one treatment for the full effect to be gained.

Your method of treatment is gentle, non invasive, completely painless and, very effective. We are recommending you to everyone we talk to!

Many thanks again from us both.

Yours Sincerely
