Dear Patt

Many thanks for your recent work on my jaw and neck which have been dramatically better ever since.

Following an hour long traumatic dental session to the back tooth on the left hand side, I was left with a very uncomfortable jaw. The one-sided pressure also left me with an ongoing aching neck and intermittent head ache.

I am delighted to report that the problem has been eliminated and that my right-side jaw joint (TMJ problem) is much improved.

I am very happy to recommend your services to anybody with a muscular skeletal problem.

Many thanks again

Kind Regards
